PREFACE

Within the Sabaot community, oral histories preserve widespread claims of an ancient Egyptian or Nile Valley origin. In these traditions, *Kingo* is identified as the foundational patriarch, while *Tamunai*—variously recorded across sub-dialects as *Samunai* or *Sanaimu*—is recognized as the foundational matriarch. The narrative records that Kingo migrated southward along the Nile basin to Mount Elgon alongside his sons, whose descendants subsequently dispersed to form the diverse Kalenjin sub-tribes.

Note on Word Classifications

Given the agglutinative nature of the Sabaot language, the identification of the verb or root—and whether that root functions primarily as a noun or a verb—was hugely challenging. As such, for this first edition, all grammatical classifications should be viewed as tentative suggestions.
